COMMERCIAL.

HONOLULU, APRIL 21, 1868.

Sixes our last issue, we have a number of fereign arrivals to report, viz.: The R L Lane from Howlard's Island, the Kamehamsha V from the Guano 6th, Full Moon, lard's Islands, the Hattle G Hall, 22 days from Baker's 14th, Last Quarter, 255, New Moon, Island, and the American back Jennie Prince, from 27th, First Quarter, San Juan, for Baker's Island.

The bark Colestia, of the Hawaiian Packet Line seried on the 17th, with the made merchandles and passengers, to Walker & Allen.

San Francisco dates are up to the 24th ult. There is nothing very important in commercial matters. The weather was bad and roads in the interior nearly impassable with the late heavy rains. Sales of Hawaiian No. 1 engars at 11 to 11% and some very choice at | expected. 1fic. Gold, in New York, by the latest telegrams, 138, which shows a gradual decline.

The back D.C Murray left this port March 7th, arrived at San Francisco on the 23d, after a fine run of 16 days, and is again fully due here

The fine American Cliper ship Syren is loaded and will sail on the Eld, for New Bedford direct, with a valuable carge of oil, hides, skins, molasses, etc.

The Brig Robert Cowan test Victoria on the Bet Mason, at the Olympic Club, last Friday, we ult., for this port, with a corgo consisting of lumber, salmon, dry goods, etc.,

The bark Celestia is engaged full of cargo, and

hear, gave great pleasure to the audience. Comments of unqualified praise from those present attest the success of the entertain-

The funeral of Hon. Jona Kapena will take place next Sunday. The body will be taken from his late residence at \$14 P. M. to the Kawaiahao Church, where services will be held by Rev. H. H. Parker at 4 P. M. A new tomb | Mr. Pogue and family, and Capt. Brown's has been erected in the churchyard where the remains will be deposited.

CRIME.-At Ioli, Koolau, on Sunday last, Kasnaana attempted to murder his wife, Paahao, with an axe. She was lying down with ber head covered with a kihel, when he struck her a frightful blow on the neck, and a others on the arms. Her cries alarming the neighbors, they ran to the house and found Kaunaana cutting himself with a knife. He wounded himself severely in the abdomen. but did not succeed in dispatching himself. No cause if apparent for the deed as the couple had heretofore lived amicably together. Both were alive on Monday.

Tano.-This article of food, which a year ago was so scarce as to command the extraordinary price of 4c per pound, has become so plenty as to be almost unsalable. It can be readily purchased in large quantities at 1%cts per pound, and will fall still lower ere the present supply is exhausted. Many who hoped to reap large profits, when they planted during the scarcity, will be disappointed and withdraw their lands from its cultivation. The taro is from fourteen to eighteen months in maturing, so that it requires considerable forecast to manage it profitably.

VOLCANO SMOKE.-The smoke of the volcano, which hung about Honolulu for three or four days, being observed first on Friday For Sax Farnersco-per Comet, April 15-Miss the 10th ult., was also seen by Capt. Stone of orra, Louis Dalet, Alex McDonaid, Chas Schmann, the brig Kamehameha V, at sea, 480 mlles to Terra, Louis Dalet, Alex McDonard, Chas Schmann,
A Larco, M Blake, 8 Ripley.

The prisoner was charged with having embezzied the sum of \$86.37, the property of Chulan & Brothers. Verdict of not guilty.

trip to Kan. Ten or fifteen persons provisioned and equipped for sight seeing started

MURDER -Capt. Prince, of the bark Jenny Prince, which came to anchor in the roadstead on Saturday, en route from San Juan to Baker's Island, reported to the American Consul that a murder had been committed on board during the passage. The criminal, Heber Outerbridge, cook of the vessel, a negro from Bermuds, was brought on shore and committed to prison to await being sent to San Francisco for trial. Wm. Roberson, the murdered man, a Swede, and scaman, was lying asleep on the deck during the night of Tuesday, March 31, when Heber struck him on the head with a handsnike killing him instantly. He confessed that he killed Roberson, and did so in self-defense, because Roberson had several times threatened his life and Hober believed that he was in constant peril. He is a quiet, inoffensive appearing man, and peaceable, so that during the remainder of the passage, the captain did not confine him, but kept him on duty. Two witnesses will be taken from the vessel to from her; it was an earthquake that had antestify on the trial

THE ERUPTION. - Our latest reliable news which left Kealualu Friday the 3d ult. Rev. family came down. No foreign families are left in the district. Nearly two thousand earthquakes, and a fiery, terrible stream of lava, are enough to appal the stoutest perves. The fairest and most fertile parts of the district have been overwhelmed, by the lava flow on Kahuku and the mud flow on Keiwa. There are native reports that three or four distinct streams are flowing, but we await confirmation of the fact, which must soon come to hand, if it is correct. Meantime we know, that one gigantic and awful

flow exists on Kahaku. On Tuesday, the 7th, about 5 P. M., the family of Capt. Brown were startled, by an explosion and a terrific roar, about two rulles from their house. At once they saw several jets of lava mounting upward, nearly a thousand feet, while smoke and steam shot up to the clouds. The glare of the fire, cast a lurid light far and near, while the lava was seen coming down rapidly upon their doomed dwelling. The family, and the natives about the premises, ran for their lives, first in a wrong direction, haply soon corrected by Mr. Swain, whose presence of mind pointed out, that up the mountain and across the guich, was the only chance of escape. Panting and excited, the people gained the farther bank, when in a few minutes the glowing lava poured through the gulch, filling it with a stream of living fire. The stream parted at the source, to join again further down. On the enclosed space of grassy land, more than two hundred head of cattle were feeding; the terrified animals made aware of their peril, by the increasing heat and the gradual closing in of the lava, which soon covered the land at first spared, stood quiet and helpless. It was a short respite only. On came the fire, and in an instant a slight puff of smoke was

From the Advertiser, we learn that this lava stream has a course of ten miles from the crater to the sea. From the Kona side, where the editor saw it on Friday the 10th, he save: "At the left were these four grand fonn-

all that remained of the dumb beasts.

"At the left were these four grand foun-tains playing with terrific fury, throwing blood-red lava and huge stones, some as large as a house, to a height varying con-stantly from 500 to 1000 feet.

"Then there was the rapid, rolling stream, rushing and tumbling like a swollen river, down the bill, over the precipies and down the valley to the sea, surging and roaring like a cataract, with a fury perfectly inde-scribable. This river of five varied from 500 to 1200 or 1500 feet in width."

Off the coast the Kong Packet on Tuesday the 7th was surprised by the sudden elevation, about a mile off shore, of a mass of rock and lava: she was so near that mud and spray were thrown upon the sails. This occured just before the cruter opened above Capt. Brown's house, and doubtless was an effort of the imprisoned lava, that lifted the sea bed, and almost immediately found vent higher up the mountain. The flow into the sea, in a short time connected this advance post with the mainland, so that a peninsula has been formed, running out at an angle with the coast. Some appreciation of the mass of lava discharged from the new erater may be formed from the fact, of this peninsula of a mile in extent being formed in the deep sea in about 60 hours. This new

though not of such land, as will compensate our generation for the fertile land overwhelmed. The land all through Walohinu is badly fissared and moved. In one place on the road to the landing, the action is distinctly marked by a fissure, on the one side of which the road is displaced several feet. It does not match by that much, with the dis-

jointed portion on the other side. The earthquakes through the island have abated though not entirely. In Kohula, strong lankes were felt on the 14th and so also at Hilo. Further news from the eruption may be expected by the steamer this

FROM LANAL

a Meteor-An Earthquake-The Vis-it of the King. The island of beautiful vallies has been honored recently by three most distinguished visitors, which are thus chronicled in the an-

nals of Lanai:

On the night of the 16th of March, about ¼ to ten P. M., there appeared to late sittersup in Palawaii Valley, in the eastern quarter of the sky, as though issuing from Halcakala, a wondrous meteor-a globe of fire, like a burning full moon, sweeping along westerly, with a roar, and a flaming tail, in its aerial flight, lighting up the beautiful valley, like the noon-day sun, and descending apparently within the nakoko groves, bordering its rim. This was a grander acrolite than the two celebrated ones seen also by the writer, in America, in the winter of 1860. Lanal has been America, in the winter of sections one, especially honored by such visitors. One, according to unquestioned tradition, dropped in upon her about the time of Kamehameha and composed of the Best Materials. One of our Wool Presses is giving entire satisfaction on the extensive Banch of Messrs, J. & F. Sinclair, Island of Nithau, who may be considered with recent to particulars. islanders speak of a burning star that came down with a roar and a mighty shock, and smoke and detonations from the incandes-

cent celestial visitant. A party went lately to exhume the sepulchred asterold, but they found that after the lapse of so many years, such a depth of al-

THE Kona Packet fitted up her hold for pas- luvium has washed in, that it would require neers, and sailed vesterday on an excursion a greater force and more appliances than a command, to disentomb the wanderer from the Nebular Kingdom. It is supposed that this meteoric stone has an average diameter of about twenty feet, and could not be hoisted, but must be blown out of the pit that it has made. The Langians are always in expectation of getting a sockdologer from another of these fellows, that will spoil some more of their real estate, and are now look

ing for the hole that the one of the 16th is supposed to have made. The meteor was a fitting berald to the dread visitant that shook us on our plus on Thursday, the 2d inst, at about 234 P. M. We heard, boom, boom, and then we were shaken and rocked, and the crockery rattled in our cupboards. A lot of natives rushed to the haole headquarters on the island, and said the report of cannon announced the arrival of His Msjesty, who had been expected, on board the Royal Yacht Kamaile. A letter was dispatched, with a convoy of supplies-referring to the fact of the vessel's arrival being announced by the report of her guns. - The Kamaile was indeed found anchored at Honoopu, but no guns had been fired ounced His Majesty.

Again on Friday, the 3d inst., at about 31/ from the cruption is by the Kona Packet. A. M., we felt another earthquake. It awoke every islander, and a'so the King's party, from their slumbers. The earth waves seen ed to lift us up and toss us, as they rolled from east to west, keeping us moving and anxious for the space of about three minutes.

Our third, and most welcome visitor, was our most Gracious Sovereign, whom we have long expected to confer on us the distinguished honor of a visit. The Kamaile anchored in one of the most charming and picturesque of bays. Its entrance is guarded by three remarkable basaltic columns or needles. One is a perpendicular shaft, apparently more than 100 feet high, and about 20 feet diameter; the same from base to summit. It is like a column of some wondrous temple that has been washed away by the flerce Konastorms, leav ing alone this towering relic of the past. There are two smaller columns, and farther in the harbor, on the western side, there is a grand square tower, or donjon keep, about 100 feet high, 50 feet diameter at the base, and tapering to a diameter of about 25 feet at the top. The waters of the little bay were still as a mill-pond, while the trades were blowing fiercely over the lofty bluffs surrounding the harbor. The boats of the Kamaile cam alongside of a natural wharf, and landed without the slightest discomfort or inconve nience to the Royal Visitor and suite. The tents were pitched, some on the beach of smooth, flat stones, and some in caves and

rocky recesses around the bay.

There is here a grand sea cavern, within which, you can ride many hundred yards on horseback and be sheltered from the noonday heat. The picturesque bay presented a lively appearance as the islanders came down from appearance as the islanders came down from the heights to welcome the King with their simple offerings of the fruits of the island, which, though of no material value, were an evidence of present love, and according to their ancient modes of demonstrating leval-ty. All the people were pleased to see the King in vigorous health. After spending a week about the island, on a fishing excursion, the Kamaile, on the 8th, bore away for Hot

The city of Hong Kong is one of the largest business ports of China; it contains about 120,000 Chinese, and 5,500 white foreigners, besides the large milltary and naval forces stationed there by Great Britain. Over 2,000,000 tons of shipping visit the harbor annually, and the value of the exports and imports exceeds \$2,000,000 per annum. The business portion of the town is located along the water troot. business portion of the town is located along the water front, and there are several excellent level roads running parallel with the shore, each being from three to five miles long. Strange to say, the lumense business transacted yearly is done by coolie labor, there not being a single wheel vehicle, wheelbarrow included, used to transport the enormous amount of merchandise that has to pass from one warehouse to another, and from the shipping to the shore, and vice versa.

Waia'ua, March 23, 1868.

P. R. FI BETTER THAN 10 SARSAPARILLIAN

The Curative Principle of Sarsaparilla enters largely into the composition of

R. R.

One Bottle of Resolvent Better than Ten Large Bottles of Sarsaparilla. One Bottle will Purify the Blood, and Expel Corruption from the Body! So wrift is this remedy in entering into the circulation, that it has been detected in the blood

and write in az minutes after it has been taken. 1 BETTER THAN 10 R. R. Resolvent cures with astonishing rapidity every form

of Chronie, Scrofulous and Skin

Diseases, and exterminates all

corruption from the human system. One bottle of Dr. Radway's Renovating Resolvent contains more of the active curative principles of the best Jamaica Sarsaparilla,

(Sarsaparillian,) than Ten of the largest size bottles of the mixture sold under the name of Sarsaparilla The process adopted by Dr. Radway in securing extracts (prepared in vacuo,) of Medicinal Roots, Plants, Herbs, and other togetables possessing great curative proper-ties over Scrofula Chronic, Syphilitie and all skin diseases, that enters into the com-position of the Renovating Resolvent, pro-duces only ONE OUNCE of the pure extract out of 2) ibs. of the crude roots. The Inert matter that enters so generally in the large bottle mixtures and prepared under the offi-cival or pharmacopeia formula, is, by Dr. Hadway's process, cast aside as rubbish. One teaspoonful of the Resolvent is sufficlent for a dose for all Skin Diseases.

Rheum Pimples, Blotches, Sores and Erup-tions of the Skin, Humors in the Blood, &c. One tex-poonful, three times per day, will, in a few days, make the Blood pure, the Skin clear, the Eyes bright, the Complex: and transparent the Hair strong, and remove all Sores, Pampies, Blotches, Pustules, Tet-ters, Cankers, &c., from the Head, Face, Neck, Mouth and Skin. It is pleasant to take,

and the dose is small. and the dose is small.

The first dose that is taken seizes on the disease and commences its work of resolving away all diseased deposits, Purifying the Blood, and driving corruption from the The Renovating Resolvent, if used in any

of the following named complaints, will pos tively cure the patient: Skin Diseases, Carles of the Bones, Edmors in the Blood, Constitutional, Chronic and Serofulous Diseases, Scrofula, scrofatous Diseases, Serofata, syphilis, Fever Sores, Ulcers, Sait Rheman, Erysipelas, Rickets, Scald Head, Sore Legs, Cankers, Glandular Swellings, White Swellings, Bolls, Nodes, Sore Ears, Sore Eyes, Strumous Discharges from the Ear, Optimismin, Rich, Constitutinal Debits. ity, Wasting and Becay of the Body, Skin Eruptions, Pimples and Blotches, Tumors, Cancer-ous Affections, Dyspepsia, Wa-ter Brash, Neuralgia, Chronic Blacumatism and Gout, Diseases of the Kidneys, Bladder, Ure-

thra, Strictures, Difficulty of Passing Water, Calculous De posits, &c. AVARMING INCREASE OF BLADDER KIDNEY and CALCULOUS DISEASES. The annual reports of the Health Commi-stoners of different cities, show a great increase of denth from diseases of the Kid-neys and Urinary Organs—RADWAY'S RENOVATING RESOLVENT is the only remody that has dissolved calculous concertion.

Its 80° ENT, disective, bibliotriptic and toxic properties exceed that of any medicine in the world: it readily assimilates with the fluids, and promotes their exit through the Kidneya, Ureter and Bladder removing calculous obstructions, and correcting all deron-poments of these organs.

So swift is this reactly in passing into the cir-ment. That it has been accorded in the urine in a z minutes after it has been taken; by adding to the liquid when cold a few pieces of starch, then a few drops of nitric acid, the liquid then a few drops of nitric acid, the liquid will change to a blue color. When brick dust, or a thick white deposit, like the white of an egg, (albumen, is detected in the vessel, or bloody discharges from the urethra, or micturating in drops, accompanied by a burning or scalding pain—the RESOLVENT should be used, and R. R. RELIEF rubbed

on the some &c.

RADWAY'S PILLS being an aperion, soothing, and tonic laxative, are the only purgative medicine safe to administer in these difficulties; their mild, soothing and healing properties produce evacuations without irritating the mucous membranes of the bowels, kidneys, ureter, bladder, &c., or causing straining when at stool.

Price of Resolvent, \$1 per bottle, or 6 for \$5. Pills: 25 cts. R. R. Relief, 50 cts. per bottle.! Principal Depot, 87 Maiden Lane, N. Y. Sold by all Druggists and Country Morchants.

For Sale by

H. HACKFELD & Co. 111 Merchants.
